

## Stainless Steel Floor Sink, With Tray WTYC-30P-F-11-T

- Description** : It is a siphon-regulated, point-by-point wastewater evacuation product that can be cleaned to transfer wastewater formed in the installation facilities. This Drainage Systems product will prevent bacteria formation, which will create a precaution from wastewater installation to odor and pest input.
- Product Code** : WTYC-30P-F-11-T
- Areas of Use** : Food Industry (Meat, Fish, Milk, Dairy Products, Bakery Products, Fat Food, Beverage, etc.)  
Health Sector (Hospital, Laboratory, Pharmaceutical Production-Storage), Chemistry, Petro-Chemistry, Automotive, Cosmetics, Logistics and Transportation, Tourism Sectors, Shopping Malls, and Supermarkets
- Technical Specifications** : Gradual pan, horizontal outlet in the second, antibacterial (demountable) siphon, the first forehead twist of the canal and the second twist where the upper grille sits, reinforced with filled iron tingling with a cross-section of 14x14 mm from the bottom, barking to anchorage and height adjustment parts.
- Dimensions** : 300 x 300 x 200 mm
- Output Measure** : DN100 (Ø110 mm)
- Odor Retention Water Depth** : 50,00 mm
- Solid Waste Holder Type** : Bucket type strainer with basket.
- Top Grid Type** : Reinforced honeycomb type (completely 2.00 mm thick)
- Material** : Complete AISI304 quality stainless steel product with a pan and top grille 2.00 mm thick
- Weight** : 9,50 kg
- Packaging** : It is shipped in single packages with nylon shrink, in boxes, pallets, or cases, depending on the quantity.
- Explanation** : Drainage systems made of AISI304 or AISI316 grade stainless steel, siphon and duct production are made on a standard or project basis.
